

Your Total LCD Solution Provider

2.4" & 2.8" TFT Change and Availability Notice

May 02, 2017

Dear Valued Customer,

In June 2015, our Shenzhen factory built a new TFT fab. This allowed us to upgrade many of our TFT displays and promote our AFY B0 series TFT beginning back in January 2016. At that time, we upgraded to the newer generation production line to insure longer product availability to our customers. Our feedback from customers is that 95% of them were not able to see any difference in optical performance so the upgrade was very successful. Some customers may need to slightly modify the initialization code for the new modules. We have had great success since upgrading our TFT 3.5" ~7.0" B0 series.

We are excited to announce that we have completed the AFY series upgrading to B0 series for the following items:

[AFY240320B0-2.4N6NTM](#)

[AFY240320B0-2.4N6NTM-R](#)

[AFY240320B0-2.8N6NTM](#)

[AFY240320B0-2.8N6NTM-R](#)

You can click the above link to check the full specification details.

Also, kindly note that for TFT 2.4" & 2.8" B0 series, are now offered with medium brightness, and price is even more competitive than the A0 series.

We have limited samples in stock, and are able to send to our customers for confirmation if needed.

The last buy of A0 series TFT will be Oct.30, 2017.

Sorry for any inconvenience caused for customers currently using the A0 series but we hope the lower cost and longer availability will ultimately be of value to our customers. If you have any questions, please contact us freely.

Sincerely,

Bill Cheung/Marketing Manager
