

Specification for Embedded TFT

AGU320480A00-3.5N12NSN

Revision 01

Α	Orient Display
GU	GUS System
320480	Resolution 320 * 480
A00	Serial A00
3.5	3.5"(Screen), Module Dimension 65.08×84.71x7.40mm(PCB)
N	TN Display
12	12 o'clock
N	Top: -20~+70°C; Tstr: -30~+80°C
S	Standard Configuration
N	Normal Brightness, 250cd/m2
/	No Touch Panel
/	Controller <u>ST7365P</u> + <u>STM32G030/NP9158</u> + <u>W25Q64</u>
/	UART Interface

DATE	DESCRIPTION
2024-5-9	First release

Orient Display (N.A.) Ltd. 220 Royal Crest Court, Unit 06, Markham, ON, Canada L3R 9Y2 Tel: 905-477-1166 Fax: 905-477-1782 Orient Display (USA) Corp. 14925 SE Allen Road, Suite 203 B, Bellevue, WA 98006 Tel: (425)698-1938 Fax: (425)698-1852

1. DISPLAY CHARACTERISTICS

Item	Contents	Note
Resolution(H*V)	320×480 Dots	
Colors	65k(R5G6B5)	
Active area (L*W)	48.96mm(L)×73.44 mm(W)	
Viewing area (L*W)	49.96mm(L)×74.39 mm(W)	
Module size (L*W*H)	65.08mm(L)×84.71mm(W)x7.40(H)	
Back light type	LED	
Touch Panel Type	without TP	
Controller IC	ST7365P+STM32G030/NP9158+W25Q64	
Viewing Direction	12 o'clock	
Contrast Ratio	500(typ.)	

2. Pin Description

Pin No.	Symbol	External Connection	Function Description
1	GND	Power Supply	GND
2	RX	MPU	UART232_RX, 3.3V TTL level
3	TX	MPU	UART232_TX, 3.3V TTL level
4	VDD	Power Supply	3.3V

3. Electrical Characteristics

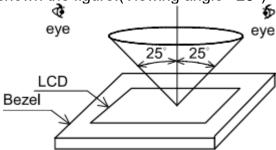

Item	Symbol	Condition	Min.	Тур.	Max.	Unit
Operating Temperature Range	Тор	Absolute Max	-20	-	+70	O°
Storage Temperature Range	Tst	Absolute Max	-30	-	+80	٥C
Supply Voltage	VDD		3.0	3.3	3.6	V
Input High Voltage	VIH		0.8*VDD	-	VDD	٧
Input Low Voltage	VIL		0	-	0.2*VDD	V
Supply Current	IVCI		-	130	-	mA
Power Consumption	PLCM		-	429	-	mW

4. Appearance Standard

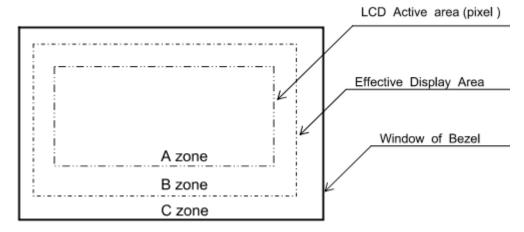

4.1 Appearance Inspection Condition

Visual inspection should be done under the following condition.

- 1) The inspection should be done under in the dark room(about 1000lx,500lx min, and non-directive)
- 2) The distance between eyes of an inspector and the LCD module is 30cm.
- 3) The Viewing zone is shown the figure.(Viewing angle ≤25°)

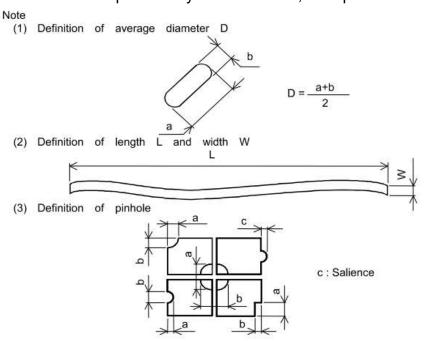

4.2 Definition Of Each Zone

4.3 Appearance Specification

Note: if a problem occurs in respect to any of these items, both parties will discuss in more detail.

5 Reliability Test Conditions

No.	Test item	Test condition	Inspection after test
1	High temperature storage	80±2°C/120 hours	
2	Low temperature storage	-30±2°C/120 hours	
3	High temperature operating	70±2°C/120 hours	
4	Low temperature operating	-20±2°C/120 hours	
5	Temperature cycle	-20±2°C~25°C~70±2°C*10cycles (30min.) (5min.) (30min.)	
6	Damp proof test	60°C*90% RH/96 hours	Note 1,2
7	Vibration test	Frequency: 10Hz~55Hz~10Hz Amplitude: 1.5mm, X, Y, Z direction for total 3hours (Packing condition)	
8	Dropping test	Drop to the ground from 1m height, one time, every side of carton. (Packing condition)	
9	ESD test	Voltage : ±800V R : 330Ω C : 150pF Air discharge, 1 time	

Note 1: No condensation to be observed. Note 2: Conducted after 4 hours of storage at 25°C, 0%RH.

6. HANDLING PRECAUTIONS

6.1 Mounting method

The LCD module consists of two thin glass plates with polarizes which easily be damaged. And since the module in so constructed as to be fixed by utilizing fitting holes in the printed circuit board.

Extreme care should be needed when handling the LCD modules.

6.2 Caution of LCD handling and cleaning

When cleaning the display surface, Use soft cloth with solvent

[recommended below] and wipe lightly:

- .lsopropyl alcohol
- Ethyl alcohol

Do not wipe the display surface with dry or hard materials that will damage the polarizer surface.

Do not use the following solvent:

- .Water
- Aromatics

Do not wipe ITO pad area with the dry or hard materials that will damage the ITO patterns

Do not use the following solvent on the pad or prevent it from being contaminated:

- Soldering flux
- •.Chlorine (CI), Sulfur (S)

If goods were sent without being silicon coated on the pad, ITO patterns could be damaged due to the corrosion as time goes on.

If ITO corrosion happen by miss-handling or using some materials such as Chlorine (CI), Sulfur (S) from customer, Responsibility is on customer.

6.3 Caution against static charge

The LCD module use C-MOS LSI drivers, so we recommended that you:

Connect any unused input terminal to Vdd or Vss, do not input any signals before power is turned on, and ground your body, work/assembly areas, assembly equipment to protect against static electricity.

6.4 Packing

Module employ LCD elements and must be treated as such.

- Avoid intense shock and falls from a height.
- •. To prevent modules from degradation, do not operate or store them exposed direct to sunshine or high temperature/humidity.

6.5 Caution for operation

- •.It is an indispensable condition to drive LCD's within the specified voltage limit since the higher voltage then the limit cause the shorter LCD life.
- •.An electrochemical reaction due to direct current causes LCD's undesirable deterioration, so that the use of direct current drive should be avoided.
- •.Response time will be extremely delayed at lower temperature then the operating temperature range and on the other hand at higher temperature LCD's how dark color in them. However those phenomena do not mean malfunction or out of order with LCD's, which will come back in the specified operation temperature.
- •.If the display area is pushed hard during operation, some font will be abnormally displayed but it resumes normal condition after turning off once.
- A slight dew depositing on terminals is a cause for electro-chemical reaction resulting in terminal open circuit.
- •. Usage under the maximum operating temperature, 50%Rh or less is required.
- When fixed patterns are displayed for a long time, remnant image is likely to occur.

6.6 Storage

In the case of storing for a long period of time for instance, for years for the purpose or replacement use, the following ways are recommended.

- •.Storing in an ambient temperature 10°C to 30°C, and in a relative humidity of 45% to 75%. Don't expose to sunlight or fluorescent light.
- •.Storing in a polyethylene bag with the opening sealed so as not to enter fresh air outside in it . And with no desiccant.
- •. Placing in a dark place where neither exposure to direct sunlight nor light's keeping the storage temperature range.
- Storing with no touch on polarizer surface by the anything else.

It is recommended to store them as they have been contained in the inner container at the time of delivery from us.

6.7 Safety

- •.It is recommendable to crash damaged or unnecessary LCD's into pieces and wash off liquid crystal by either of solvents such as acetone and ethanol, which should be burned up later.
- •.When any liquid leaked out of a damaged glass cell comes in contact with your hands, please wash it off well with soap and water.

7. PRECAUTION FOR USE

- **7.1** A limit sample should be provided by the both parties on an occasion when the both parties agreed its necessity. Judgment by a limit sample shall take effect after the limit sample has been established and confirmed by the both parties.
- **7.2** On the following occasions, the handing of problem should be decided through discussion and agreement between responsible of the both parties.
- •. When a question is arisen in this specification.
- •. When a new problem is arisen which is not specified in this specifications.
- •.When an inspection specifications change or operating condition change in customer is reported to ORIENTDISPLAY, and some problem is arisen in this specification due to the change.
- •. When a new problem is arisen at the customer's operating set for sample evaluation in the customer site.

8. PACKING SPECIFICATION

---TBD

9. Mechanical Drawing (Unit mm, Un-tolerated ±0.3 mm)
