

ORIENT DISPLAY

MAKE THINGS POSSIBLE

Nov 24th, 2025

Dear Valued Customers:

Orient Display's [Industrial Touchscreen Monitors](#) deliver high brightness and smart performance in a rugged, all-metal design. Powered by a Rockchip RK3568 Quad-core Processor with 2GB DDR and 32GB eMMC storage, they offer efficient computing with low power consumption. Available in 7" and 10.1" models featuring 1000 nits high-brightness displays and industrial-grade capacitive touch panels, these monitors ensure excellent visibility even under strong sunlight—ideal for industrial automation, medical equipment, commercial terminals, and vehicle control systems. Samples now available with a matching power adapter for easy testing and evaluation.
